Assignment cover Sheet

PC Technician Skills – Level 3

The appropriate cover sheet must be completed for each unit submitted

Unit 1   PC Systems Process

Learning Outcomes	Y/N	Assessment Criteria	Y/N
The learner should be able to:		*The Learner has achieved this outcome because s/he can:*	
1.0 Identify common PC start-up problems		1.1 Use a process of elimination to identify common problems	
		1.2 Identify sources used in selected assignment/task	
2.0 Use forums for solving PC faults and building networks with fellow engineers.		2.1 Demonstrate joining a class forum.	
		2.2 Participate in a forum thread about a technical issue.	
3.0 Identify compatible hardware to build a PC		3.1 Identify an appropriate chip set	
		3.2 Explore the chip set limitations from the manufacturer.	

Assignment Title:		
Developing processes for logical fault finding.		
Assignment Brief: This assignment will encourage learners to seek solutions to problems which are outside their personal knowledge base, by building a network of solutions and using logical processes to eliminate faults.		
In your assignment you should: • Review a forum thread, with a minimum of five posts, which has resolved a technical problem with a PC. Consideration should be given to how long the process took, how many people became involved and the etiquette followed. • Show evidence of joining a forum and posting a new thread and evidence of replying to an existing thread. • Identify suitable PC components within a set budget for a specified motherboard.		
Date Set : 21 October 2008	Date Due: 19 November 2008	Date Submitted:

Disclaimer to be completed by the learner for each unit submitted for assessment:

"This is all my own work and all sources including Internet sources have been acknowledged and attributed in the text and bibliography. I have read and understood the document entitled 'Policies and Procedures with dealing with Malpractice' provided by the tutor and realise the effects of non-compliance with this document.
